A FREE full-day training that will arm you with information, tips, and tools needed to introduce the Share The Care™ model to your patients and family caregivers. It's a unique team approach that systematically shows ordinary people how to organize friends, neighbors, and work colleagues into a "caregiving family" so they can provide "quality of life" care and emotional support for someone they know in need.

The Share The Care model has helped people all across the US and Canada manage the caregiving needs of a wide variety of illnesses (temporary or terminal), disabilities, the challenges associated with aging, and most recently with the care of quadruplets.

Participants will receive a copy of the award-winning *Share The Care* book, and a binder with 23 forms and handouts to guide you through every step in the process for holding the first Group meeting. Working in a small team, you'll experience solving some of the issues group members face on a weekly basis.
